- 29T stems from a cow family of tremendous milders and productive cattle. Carcass records have been kept on three generations of cattle on the dam side of his pedigree. 29T has thickness bred in for generations. We are using him on heifers and he has stayed in excellent condition. He produced 800 straws of semen in 9 days at Reproductive Enterprises. One of the most fertile yearling bulls they collected this spring. He could be the answer to your breeding program. His dam, that is pictured, has an excellent bull calf this year.

Semen available.
